DETAILED ACTION

Specification

The amendment filed June 22, 2007 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: a low-gluten wafer *stock mixture*.

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 5, 14-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear as to how the "stock mixture" as it exists can contain water at the recited temperature.

It is also not clear as to how claims 16 and 17 further limit claim 14. Claims 16 and 17 are missing essential subject matter. It is not clear as to what essential properties are required by limitations of claims 16 and 17. The limitations are not enabling.

Art Unit: 1761

Applicant's arguments filed May 21, 2007 have been fully considered but they are not persuasive. Rejection of claims 1 and 5 is maintained for the reasons of record stated in the previous Office action.

Claim Rejections - 35 USC § 103

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim 1, 5, 14-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wernecke (DE 1927394).

Art Unit: 1761

Wernecke discloses a bread mix for low-protein diets. Wernecke also discloses a low gluten bread product that contains maximum 0.3% by weight gluten (Abstract). Wernecke also discloses the bread product comprising wheat starch, pregelatinized wheat starch and water (Abstract). Wernecke discloses that low-gluten bread product is designed for people suffering from Celiac disease (Translation p.1). Wernecke discloses that pregelatinized wheat starch serves as a structure improving component (Translation p.3). Wernecke also discloses baking temperature of 400F (Translation p.5).

It was well known in the art that traditional communion wafers served during Roman Catholic Communion services are made out of two ingredients, wheat flour (wheat component) and water. Since Wernecke discloses low-gluten bread product for people suffering from Celiac disease by using wheat starch and pregelatinized wheat starch as a wheat component, one of the ordinary skill the art would have been motivated to modify disclosure of Wernecke and to employ wheat starch and pregelatinized wheat starch as a wheat component in preparation of communion wafers. One of the ordinary skill in the art would have been motivated to do so, since using water and wheat component in preparation of communion wafers was a well established fact in the art. One of ordinary skill in the art would have been motivated to vary amount of "stock mixture" depending on the size of the final product desired. One of the ordinary skill in the art would have been motivated to vary amount skill in the art would have been motivated to vary amount of "stock mixture" depending on the size of the final product desired. One of the ordinary skill in the art would have been motivated t do so since use of wafers of different sizes was a well established fact in the art.

Response to Arguments

Applicant's arguments with respect to claims 1-5 rejected under 35 U.S.C. 102(b) as being anticipated by Wernecke (DE 1927394) have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vera Stulii whose telephone number is (571) 272-3221. The examiner can normally be reached on 7:00 am-3:30 pm, Monday-Friday.
